DAY 2

What you learned, impressed, things you want to write down, etc.

DAY 3

What you learned, impressed, things you want to write down, etc.

DAY 4

What you learned, impressed, things you want to write down, etc.

Reflection of the trip

I would like you to give a presentation after return to Japan on the following three questions!

After connecting with abroad, what is exploratory learning for you?

Meeting Japanese participants for the first time, what can you share with them as an educator and what can you not share? (To the people, to the educational system, to the environment)

What have you really learned from the differences between the two countries (environment, national systems, personalities) when you visit Japan?

Preparation List
